TODAY'S LAMINATES ARE TORLYS LAMINATES

Laminate flooring has been hailed as one of the biggest innovations in floor covering of the past 25 years. The idea was simple and practical; to create a flooring product that would be durable and stylish, and as easy to care for as the popular wood-grained laminate countertops of the era. Laminate flooring was a huge success, first in Europe, and then in the North American Market. And why not? Laminate flooring was an economical alternative to hardwood, durable enough for rough-housing kids, great for allergy sufferers, and could be installed anywhere in the home, on grade, above grade, or below grade. Installation was so quick and easy that most homeowners could do it themselves, making laminate flooring an even more attractive option.

The technological tweaking of laminate flooring has continued over the years, and today's products are truly ingenious. Alberta Hardwood Flooring carries the complete line of **TORLYS** laminate flooring. **Provence** is available in a rich, detailed hand-scraped surface, as well as smooth and naturally textured surfaces in a wide assortment of colors and beveled edges. Uptown offers everyday-chic styling, natural wood graining, beveled edges, and is available in three different lengths in smooth or textured finishes. If you prefer the look of 'square edge' flooring, TORLYS Park Lane features smooth or gently textured elongated planks in wide plank or double plank designs or opt for the classic versatility of Mainstreet, available in 7 1/2inch wide planks, in double or three strip design. Best of all, all TORLYS laminate flooring features the Uniclic joint, a patented locking system that locks in gap-resistant stability and allows you to 'unlick' your laminate flooring for reinstallation in another room.

Today's laminates are TORLYS laminates, and the complete line is waiting for you at Alberta Hardwood Flooring.
